# Use-Case Specification: View Timeline

1.   View Timeline

1.1   Brief Description

This Use-Case allows the users to see the last 10 places they had visited. Of course it is possible to scroll and see more older places.

2.   Flow of Events

2.1   Basic Flow

This is the Activity Diagram for showing the visits in the Timeline.

```gherkin
Feature: View the Timeline on BestPlaces

  As a user
  I want to see the Places I have been visited
  so that I get an overview about where I was when

  Scenario: View Timeline
    Given I am signed up
    And Loged in
    When I press in the Dashboard the "Timeline" Button
    Then I should see the "Timeline"

  Scenario: View older Visits
    Given I am in the "Timeline"
    And I can see my ten last "Visits"
    When I scroll
    Then I should see ten more "Visits"
```
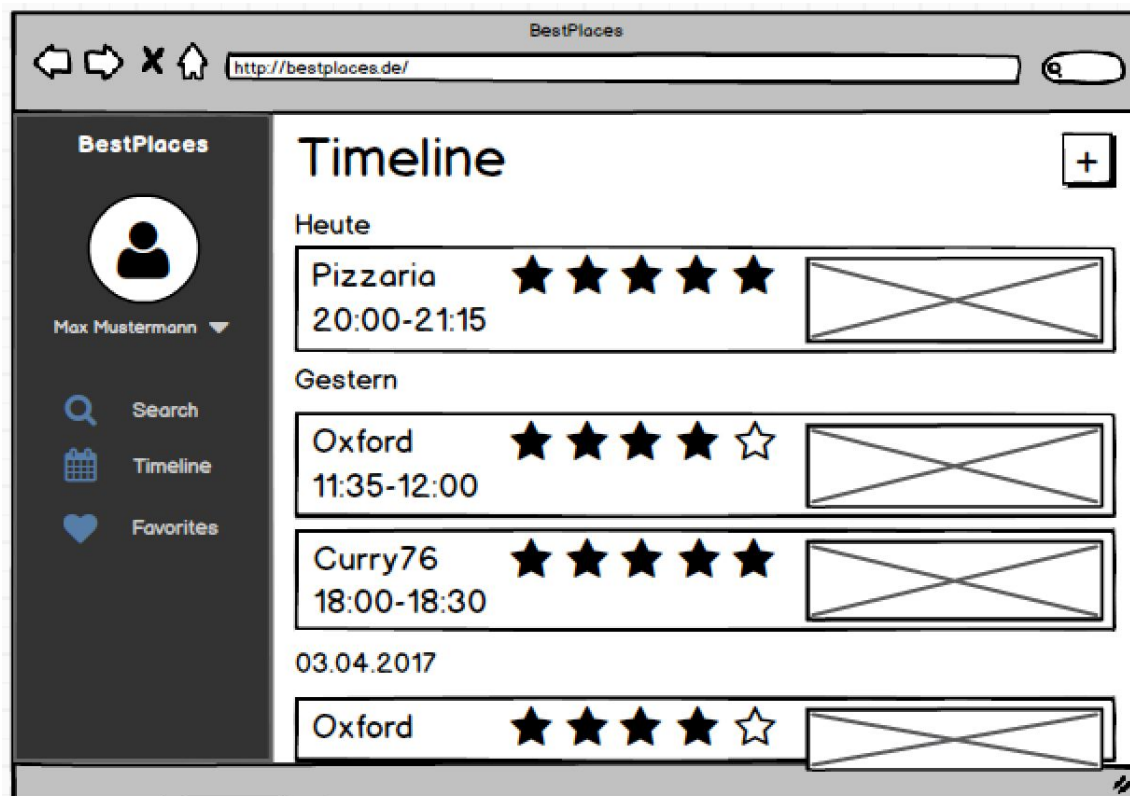

The feature file for "View Timeline".

This is the Mockup for the Timeline.

2.2 Alternative Flows

n/a

3. Special Requirements

n/a

4. Preconditions

4.1 Valid log-in

The user must be signed-up and logged-in.

4.2 Existing visits

Furthermore, he needs to have at least one visit in his timeline to be able to see something.

5. Postconditions

5.1 Scrollable

If the user has more than 10 visits, he should be able to scroll and load more visits.

6. Extension Points

n/a
